More information

Tohaco motorcycle transporter, available with two different operating systems. Check out and compare the specifications.

TOHACO

Comfortable and safe transport thanks to unique air suspension system

The air suspension ensures that you and your bike arrive at your destination in comfort. The low platform, between the wheels and the air suspension ensure excellent road handling.

- Comfortable for driver and load
- Fully independent air suspension
- Easy loading and unloading
- No ramps required
- Optimal suspension, with and without load
- Particularly safe
- Level control; also with weight difference between left and right

Air suspended trailer for transporting motorcycles

This Tohaco trailer brings together all the requirements for transporting your motorbike in comfort and with ease. The trailer was developed in cooperation with experienced motorcyclists. This has resulted in a trailer that is extremely comfortable and stable, has safe road handling and exceptional loading convenience.
